

Decision Clarity Canvas

A two-page tool for making consequential decisions easier to understand, challenge and act on.

DESIGNED FOR

Leadership teams facing a cross-functional decision with real trade-offs, uncertainty and multiple affected groups.

One decision, made clear

01

1. Decision

What exactly must be decided? Write it as a choice, not a topic.

02

2. Owner

Who is accountable for making the decision after listening to the right perspectives?

03

3. Why now

What event, risk or opportunity gives this decision a useful time boundary?

04

4. Outcomes

Which outcomes should the decision improve? Which outcomes must it protect?

05

5. Constraints

What is fixed? What only appears fixed?

06

6. Trade-offs

What are we willing to make harder, slower or more expensive?

07

7. Assumptions

Which beliefs would materially change the choice if they were wrong?

08

8. Contributors

Who has evidence, will execute the choice, or will carry its consequences?

09

9. Revisit signal

What new evidence or date should trigger a review?
